

Product Data Sheet

Bespoke pre-charged Solvent Aerosol

Description

Bespoke Pre-charged Solvent Aerosol is blended with quality solvents and propellant, to work with most automotive and industrial paint systems used in the market place today.

The distributor is liable for the final product filled into this aerosol.

Directions for use

SHAKE CAN FOR AT LEAST TWO MINUTES BEFORE USE

Prepare the area to be painted, ensuring it to be free from dirt, wax, oil, etc.

Mask off with masking paper and masking tape to prevent any overspray.

Use between 15 to 25°C in a well ventilated area.

Shake can vigorously for at least two minutes to ensure the paint is thoroughly mixed. Repeat shaking at regular intervals during use.

Spray from a distance of 20cm to 25cm.

Apply several light coats with up to 10 minute intervals between coats to achieve the best result.

The number of coats required depends on which paint brand has been filled into this aerosol.

After use invert can and spray to clear the valve and sprayhead, this prevents the aerosol from clogging up prior to using next time.

If sprayhead should clog , remove and clean with solvent.
